

# INDEX OF AUTHORS' NAMES.

## ABSTRACTS. 1889.

And also to Transactions, 1889 (marked TRANS.); and to such papers as appeared in Abstract of Proceedings (Nos. 58 to 73, Dec., 1888 to Nov., 1889, inclusive), but not in Transactions (marked PROC.).

### A.

- Abenius, P. W., and O. Wildman, action of bromine on orthacetotoluidide at a high temperature, 134.  
— — halogen-substituted acetamido-derivatives of the aromatic series, 134.  
Abraham. See Bamberger and Hoskyns-Abraham.  
Abt, W., benzoylethylcarbamide, 609.  
Adie, R. H., compounds of arsenious oxide with sulphuric anhydride, TRANS., 157.  
Adrian. See Baudet.  
Ahrens, F. B., alkaloids of mandragora, 1074.  
— dipiperidyl and dipicolyl, 59.  
— mandragorine, 1222.  
Albertoni, P., action of carbohydrates on the animal organs, 1023.  
Albrecht, K., new method of formation of benzhydrol derivatives, 263.  
Aldehoff, G., influence of starvation on the glycogen of the liver and muscle, 427.  
Alessi, A., lecture experiments, 567.  
Alla, L. See Aubin.  
Allain-Le-Canu. See Le-Canu.  
Allary, E., chlorine and cyanogen, 13.  
Allen, A. H., adulteration of lard with cocoa-nut oil, 320.  
— detection of cotton-seed oil in lard, 319.  
— detection of "saccharin" in beer, 322.  
Allihn, F., the rise in the zero point of thermometers made of Jena glass, 1041.  
Alt, H., bromination of orthoacetylamidobenzoic acid, 986.  
— quinoline, 1214.  
Althausse, M., and G. Krüss, relations between the composition and absorption-spectra of organic compounds, 1093.  
Amagat, E. H., compressibility of hydrogen, oxygen, nitrogen, and air at very high pressures, 8.  
Amat, L., phosphorous acid, 825.  
— sodium phosphite, 569.  
Ambühl, G., adulteration of lard, 659.  
Anderlini, F., derivatives of pyrrolinophthalide, 58.  
Anderlini, F. See also Ciamician.  
André, G., formation of mercurammonium chlorides, 827.  
— properties of the mercurammonium chlorides, 570.  
André, G. See also Berthelot.  
Andreasch, R., thiocarbimideacetic acid and rhodanic acid, 960.  
Andrews, T., electrochemical effects of magnetizing iron, 92.  
Andrews, T. (the late), properties of matter in the gaseous and liquid state under various conditions of temperature and pressure, 95.  
Angeli, H. See Magnanini.  
Anschütz, R., Raoult's method of determining molecular weights, as used to distinguish between isomerism and polymerism, 754.  
— Reissert's anilosuccinic acid and anilpropionic acid, 707.  
— Reissert's pyranilpyroic acid, 142.  
Anschütz, R., and F. Hensel, Reissert's deoxyranilpyroic dibromide and bromodeoxyranilpyroic acid, 258.  
Anschütz, R., and G. Schultz, behaviour of primary aromatic amines with sulphur, 602.  
Anselm, F., hydronaphthalic acid, 717.

- Antoine, C., dilatation and compression of air, 460.  
 — dilatation and compression of carbonic anhydride, 668.  
 Appleyard, J. R. See Knecht.  
 Arapides, L., conversion of ketone thiocyanates into oxythiazoles, 413.  
 — isothiocyanoacetic acid, 414.  
 Archbutt, L., analysis of grease, 321.  
 Arcy. See D'Arcy.  
 Armstrong, H. E., note on the determination of the molecular weight of substances in solution, especially colloids, PROC., 109.  
 — note on the hydration of cyanides, PROC., 122.  
 — note on the interaction of metals and acids, PROC., 66.  
 — the constitution of  $\beta$ -naphthol- $\alpha$ -sulphonic acid (Bayer's acid), PROC., 8.  
 — the sulphonation of naphthalene- $\beta$ -sulphonic acid, PROC., 10.  
 Armstrong, H. E., and E. C. Rositer, action of halogens on  $\beta$ -naphthol, PROC., 71.  
 Armstrong, H. E., and W. P. Wynne, isomeric change in the naphthalene series, No. 5,  $\beta$ -iodonaphthalenesulphonic acids, PROC., 119.  
 — — nitration of naphthalene- $\beta$ -sulphonic acid, PROC., 17.  
 — — nitro- $\beta$ -chloronaphthalene, PROC., 71.  
 — — note on the 1 : 3-homo- and the isomeric hetero- $\alpha$ - $\beta$ -dichloronaphthalenes melting at nearly the same temperature, PROC., 5.  
 — — the determination of the constitution of the heteronuclear  $\alpha$ - $\beta$ - and  $\beta$ - $\beta$ -di-derivative of naphthalene, PROC., 34, 48.  
 Arnaud, crystalline compound from glabrous strophantus, 407.  
 — tanghinin from *Tanghinia venenifera*, 900.  
 Arndt, E. M., volatile base from the root of *Cephalis ipecacuanha*, 918.  
 Aronstein, L., and A. F. Holleman, conversion of acetylene into ethylene derivatives by the direct addition of hydrogen, 878.  
 — — stilbene, 51.  
 Arrhenius, S., electrolytic dissociation, 1099.  
 — heat of dissociation and influence of temperature on the dissociation of electrolytes, 1044.  
 — rate of change in the inversion of cane-sugar by acids, 1103.  
 Arsonval. See d'Arsonval.  
 Arthus, M. See Dastre.  
 Arzberger, H. See Zincke.  
 Aschan, O., preparation of  $\alpha$ -dibromhydrin, 31.  
 Aubel, E. v., electrical resistance of bismuth, 807.  
 Aubin, C. See Graebe.  
 Aubin, E., and L. Alla, estimation of nitrogen by Kjeldahl's method, 648, 925.  
 Auger, V. See Béhal.  
 Austen, P. T., diamidophenyl thiocyanate, 700.  
 — hypochlorous acid in alkaline solution, 672.  
 — lecture experiments, 754.  
 — lecture experiments with nitric acid, 672.  
 Auwers, K., preparation of oximes, 689.  
 Auwers, K., and M. Dittrich, structure of the oximido-group in the isomeric benzilmonoximes, 1192.  
 Auwers, K., and V. Meyer, action of heat on benzildihydrazone, 51.  
 — — isomerism of the benzildioximes, 403.  
 — — isomerism of the oximido-compounds, 609.  
 — — oximes of phenanthraquinone, 1201.  
 — — tetramethylsuccinic acid, 1145.  
 — — tetraphenylsuccinonitrile, 883.  
 — — the third benzildioxime, 713.  
 — — two isomeric benzilmonoximes, 611.
- ### B.
- Bachér, F., methylstilbazole and its reduction products, 162.  
 Badl, V. See Goldschmidt.  
 Baelde, A., and H. Lavrand, biliary acids in urine during jaundice, 637.  
 Baessler, comparative manurial value of the nitrogen in sodium nitrate and ammonium phosphate, 436.  
 Baessler, P., estimation of the oil and water in linseed cake, 321.  
 Baeyer, A. v., constitution of benzene, Part II. Reduction of terephthalic acid, 1176.  
 Baeyer, A., and E. Kochendoerfer, action of phenylhydrazine on phloroglucinol and resorcinol, 1162.  
 — — catecholphthalein, 1153.  
 Baeyer, A., and W. A. Noyes, succinosuccinic acid, 1147.  
 Baeyer, A., and F. Tutein, reduction-products of hydroxyterephthalic acid, 1180.
